**XL-BRAND** canadian in brine

**Pandalus borealis**

The shrimps are imported directly from the producers in Canada – cooked, peeled, and frozen. We brine and pack them here at our factory. A price-competitive alternative to our other Pandalus borealis products. The quality of the raw material is top-high and it is a first-class product within this segment of shrimps in brine. We supply in plastic buckets of 900 g drained weight.

## From Fish Industry to Food Industry

Taabbel was founded in 1896 in Thisted and is a solid and stable company which has developed from a minor fish industry to a highly technological and specialized company.

Taabbel is one of the leading companies at the market, and produces all types of value-added fish products for the catering sector both at home and abroad.

## Close To The Fish

In 1967 the company moved to Hanstholm, close to the wide fishing grounds in the North Sea.

The strategical placing makes it easy for Taabbel to honour its indispensable demand for fresh raw material of high quality.

## To Taabbel Quality and Control is Alpha and Omega

Fresh raw material, specially developed processing and freezing technique guarantee appetizing products that keep the natural taste and nutritive value.

Taabbel has a well-developed control unit with laboratory staff and a biologist. This fact ensures that our products honour all quality requests made by big international companies. This includes the bacteriological as well as the technical control.

EC-approved self-control-programme based on the HACCP-principle and ISO 9002 certified cleaning.
